LEAARC has provided this syllabus template to provide guidance to Program Directors. It is an optional resource which provides a useful overview of the required elements as well as other components based upon common academic convention. A program’s institution may require other items in the syllabus and that is perfectly acceptable. In addition, it may be that some required sections are placed in addenda that are also accessible to the students. If the program separates the course syllabus from the course schedule, both items need to be submitted to LEAARC for the comprehensive review.

Student Learning Outcomes (specific outcomes achieved in the course)

Upon successful completion of this course, the student will achieve the following outcomes. (It is recommended that the program use the Competencies terminology and numbering system from the LEAARC Curriculum in this section, as the students will then be able to recognize clearly what they have been taught. The program is expected to cover all competencies collectively in the program syllabi.)
